A quick guide to connecting to Oracle from SAS
Feb 11, 2017 · DB2 (remember, it has a SCHEMA object) is very similar to Oracle. My understanding is that oracle has a public role and schema is the metadata of all the objects by a user and has the same name as the login. Thus in instant case for the user 'samji' schema will be 'samji'. Free course: Data Literacy Essentials. Data Literacy is for all

Adding custom fields | Looker | Google Cloud
Sep 22, 2022 · How custom fields interpret date and time data types. Looker interprets some timeframes and time-based types as different data types when you're creating custom fields, which affects the type of custom fields that you can create for a given date or time field. Custom fields categorize date and time fields in the following ways:
